

# ARTIFICIAL INTELLIGENCE (AI)

## ITS POTENTIAL AND THE LASTING TRANSFORMATION OF THE GERMAN ECONOMY

A Study by eco – Association of the Internet Industry and Arthur D. Little

## Table of Contents

Foreword .....	4
Leading-Edge Innovation for Germany .....	5
From Using to Shaping .....	6
Executive Summary .....	7
<b>1. Artificial Intelligence Today is Both Reality and Hype at the Same Time .....</b>	<b>8</b>
1.1 Germany and German companies must act soon .....	8
1.2 What is AI and what impacts can we expect? .....	9
1.3 AI is reality .....	11
<b>2. AI in Use .....</b>	<b>14</b>
2.1 AI is a prompter, helper, and automaton .....	14
2.2 AI Applications: Language, image, and logical reasoning .....	16
2.3 Performance today: Most AI capabilities cannot keep up with people .....	18
<b>3. Technology: AI and its Building Blocks .....</b>	<b>21</b>
3.1 How AI applications develop from data, machine learning, neural networks, and analytical models .....	21
3.2 Technology radar: AI components continue to develop rapidly .....	23
3.3 Outlook: AI and quantum computers .....	24
<b>4. Benefits: Impact of AI on the German Economy in 2025 .....</b>	<b>25</b>
4.1 AI has an impact in all economic dimensions .....	27
4.2 Overview of the most high-value use cases .....	32
<b>5. Necessary Change: Strategic Transformation for Lasting Impact .....</b>	<b>41</b>
5.1 Digital shift: Ten forces of strategic change .....	41
5.2 The four strategies for companies for the use of AI .....	42
<b>6. The Regulation of AI .....</b>	<b>48</b>
6.1 The European Union .....	49
6.3 The French Republic .....	53
<b>7. AI in the eco Association: Topic Evaluation and Measures .....</b>	<b>58</b>
7.1 A simple trick is what helps us get started .....	58
7.2 Digital ethics in the AI era .....	59
7.3 AI and cyber security .....	60
7.4 AI in the new working world .....	61
<b>8. Conclusion .....</b>	<b>64</b>
